

# MLD Support Guides

## AirServer wireless casting

### Teaching and learning tips and tricks

## Multiple Displays

Airserver automatically enables multiple users to cast to the MLD.

The layout will modify based on the number of screens displayed, quickly changing when devices go from landscape or portrait mode.

## Prompting for a code

Prompting users for a code to connect to the Airserver app upon entry helps manage users casting to the MLD.

Toggle the on screen code in AirPlay, Google Cast and Miracast sections.

Click anywhere on the AirServer screen to activate the individual casting controls. Clicking the **expand** or **contract** arrows, you can choose which device to feature. To remove a device, simply tap the X in the top right of the displayed screen.

When a user attempts to cast to the MLD running AirServer, they will be prompted to enter a code. This helps to manage who can connect.

TIP - You can use the keyboard to cycle between screens. Just press 1,2,3,4 etc

To access additional MLD resources scan the QR code.
