Creating a Site Profile

A site profile can be generated by promoting a label.

First, if the label doesn't exist, create a label using the steps outlined in the how to guide, "Creating a label".

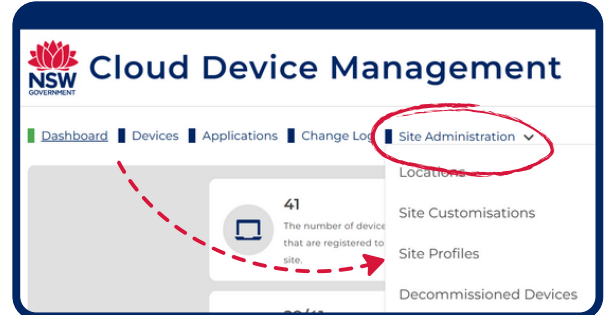

At the top of the CDM console windows click Site Administration then Site Profiles.

A list of all current site profiles with a brief description is displayed. Click the hamburger icon on the right-hand side of a site profile to view specific details regarding the profile.

To create a site profile click the Actions button then Add.

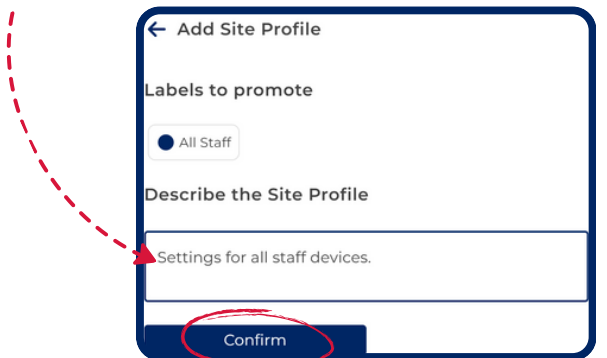

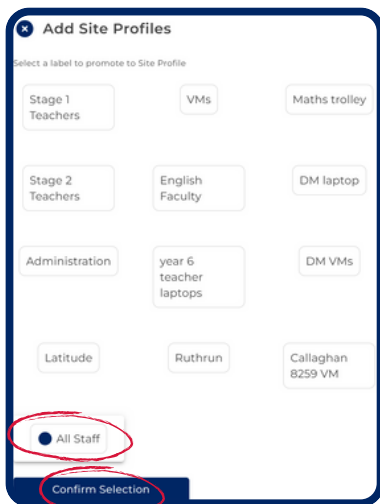

A list of labels appears on the right hand side of the screen. Choose one of these labels to promote to a Site Profile and click Confirm Selection.

Type a brief description for the Site Profile. Click Confirm. The site profile can now be customised.

This screenshot shows a table of site profiles. The table has columns for Title, Description, Built, Devices Associated, and Detail. A red dashed arrow points from the 'Detail' column of the 'Walkthrough' row to the right.

TITLE	DESCRIPTION	BUILT	DEVICES ASSOCIATED	DETAIL
Walkthrough	Settings for Demonstration	True	1	☰
testdm		True	1	☰
Storeroom Devices	dm test	True	4	☰
Modern Learning Room	K-2 modern learning lab	True	6	☰
Maths Faculty	All Maths staff devices.	True	2	☰
lost laptops		True	0	☰
Library	cccc	True	2	☰
laptops bought prior to 2022		True	1	☰
Kiosk		True	1	☰
Forestville VMs	DM testing CDM on VM at 4019	True	1	☰

Assigning a Site Profile

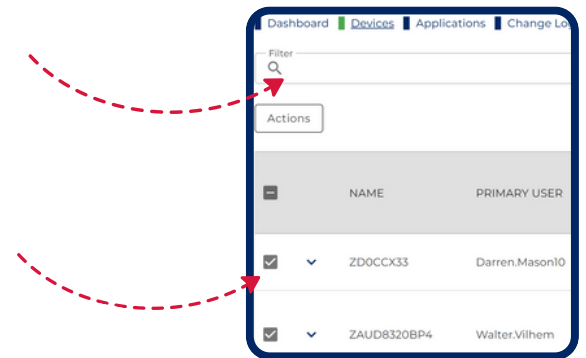

At the top of the CDM console window, click the Devices tab.

Scroll to search for the devices or simply type into the Filter box to refine your search.

Note: you can add multiple filters.

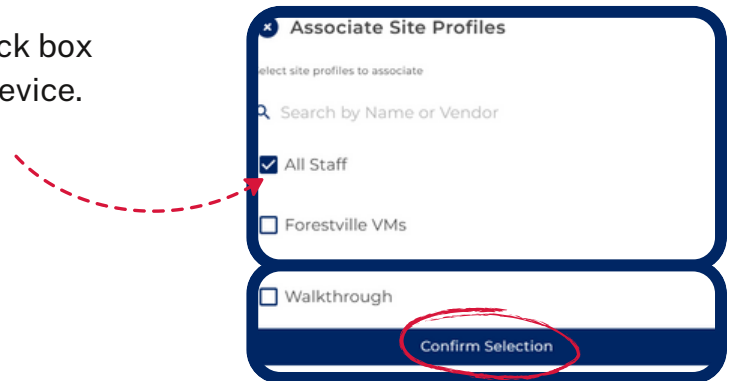

Select the devices you want to deploy the site profile by ticking the check box.

Click Actions then click Site Profiles.

On the right hand side of the screen tick the check box for the site profile you wish to associate to the device.

Click Confirm selection.

After reviewing the changes click Confirm Request.
