

# MLD Support Guides

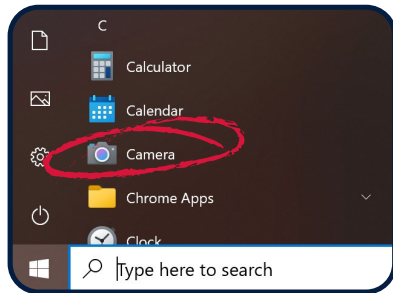

## Effective use of the webcam

### Using the Windows 10 Camera app

#### Step 1

Click or tap on the Start icon and select Camera.

#### Step 2

Adjust the webcam to the desired position.

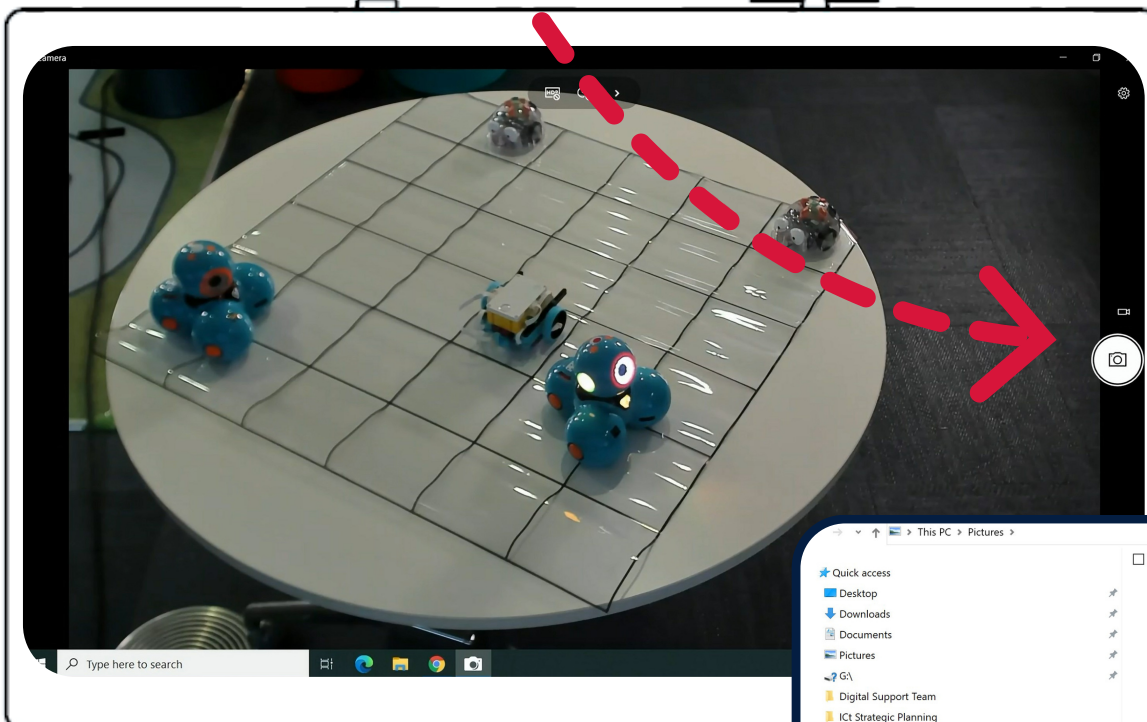

You can use pinch gesture on the screen to zoom in or out.

If you have the Meetup camera you can use the remote to adjust the camera position.

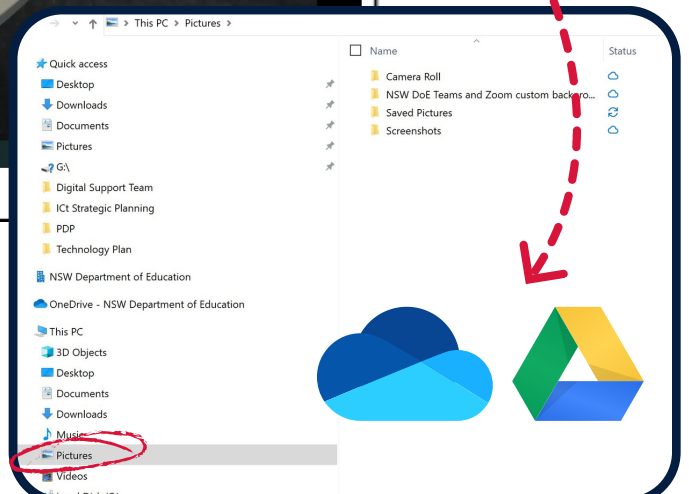

#### Step 3

Tap the Camera icon to take a photo. You can also take a panorama image, shoot a video, or scan a document or whiteboard.

The image or video will be stored in the Pictures folder under Camera Roll.

The file is ready to be moved to a cloud storage solution such as OneDrive or Google Drive.
